📍 Herat, AFGHANISTAN

Motivated and detail-oriented Software Engineer with 4+ years experience in designing and developing scalable web applications and distributed systems. Proficient in modern frameworks and tools across the full development lifecycle – from planning and architecture to deployment and maintenance. Adept at working independently or within agile teams to deliver high-quality, performance-focused solutions. Known for a problem-solving mindset, continuous learning, and a commitment to building impactful and user-centered software products.

AREAS OF EXPERTISE

Full-Stack Development

RESTful API Design & Integration

Front End Development

Cloud Deployment

Backend Development

Software Architecture & System Design

Microservices Architecture

Authentication & Authorization

Real-Time Features

WORK EXPERIENCE

Software Engineer

07/2024 - Present

Estokk Real Estate Ventures.
Montreuil, FRANCE (Remote)

- Served as the sole developer responsible for designing, developing, and maintaining the company's entire digital platform, including the real estate listing system, user accounts, and administrative dashboards.
- Built scalable backend services and APIs using ExpressJS, Web3 and Node.js, integrated with a custom authentication system and a structured database model as well as responsive frontend with Reactjs.

Software Engineer / Team Lead

02/2023 - 01/2025

Kandahar University Education Faculty Research Center
Kandahar, AFGHANISTAN

- Led and executed the full software development lifecycle independently for a research project using Node.js, Express.js, MongoDB, and React.
- Acted as a team lead by managing project planning, task prioritization, and implementation—effectively performing all roles of a development team solo.
- Coordinated with faculty stakeholders to gather requirements, provide progress updates, and align technical solutions with academic research goals.
- Demonstrated strong problem-solving skills and self-motivation to deliver project milestones on time despite resource limitations.
